

PowerPrep to Offer SAT Course at Garden City High School

PowerPrep is pleased to announce that it will be offering its famous *Comprehensive SAT Course* at Garden City High School. The course is open to all high school juniors who are residents of the Garden City School District, whether or not they attend Garden City High School.

PowerPrep is offering this course at a savings of \$650 off its regular tuition. It is important to note that this is not a course specially developed or administered by the District. Rather it is a regular PowerPrep course that, despite the greatly reduced tuition, has not been abbreviated or watered-down in any way. Except for the location of the classes, this course is identical to the *Comprehensive SAT Course* that PowerPrep has offered for the past twelve years— the course that has helped thousands of students, including several hundred from Garden City, raise their scores hundreds of points.

The course will meet on eight Tuesday evenings from 6:30 to 9:30. Classes will be held every Tuesday from January 10 through March 6, except February 21, which is during the school vacation. Although this course will be over in time for students to take the SAT on March 10, many students who will be taking the SAT for the first time in May will also take this course, and then do some additional preparation in late March and April.

The agreement between PowerPrep and the District for this pilot program strictly limits the number of students who will be able to take this SAT course. Since the course is open to all residents of the Garden City School District, not just those who attend Garden City High School, and since the course is being offered at such a steep discount, it is likely that the course will fill up quickly. To avoid getting closed out, parents who know they would like to have their children take this course should contact PowerPrep at 516-484-4468 as soon as possible.

The entire PowerPrep program in Garden City will be under the personal supervision of Dr. Ira Wolf, the author of several books, including the best selling test prep book of all time: Barron's *How to Prepare for the SAT*. His SAT book is the official text in SAT prep courses around the country and is used each year by hundreds of thousands of students. Dr. Wolf is an expert in test preparation who lectures extensively about the SAT and other college entrance exams and has helped students reach their maximum SAT potential for over 35 years. The PowerPrep instructors who will teach the course in Garden City have, on average, more than 20 years of experience in SAT preparation and have been personally trained by Dr. Wolf.

Please note that the PowerPrep program is not sponsored nor endorsed by Garden City Public Schools. Parents who have questions about the course should *not* call the high school; rather they should call PowerPrep directly at 484-4468.
